"We remain focused on driving value for our customers as we head into the important fourth quarter. In a more challenging economic environment, we are accelerating efficiency initiatives, prioritizing investments within our Better Connected strategy, and actively managing our resource allocation,"</p> <p>What DSR Says</p> <p>2023-11-14, For the second quarter in a row, Canadian Tire reported a disappointing quarter. This time, revenue barely increased (+0.5%) while EPS were down 11%. Retail sales suffered from a result of softening consumer demand, particularly in Ontario and BC, and a mix shift to more essential and value offerings. The most affected segment was Sportchek where sales dropped by 8%. Canadian Tire and Mark's comparable sales were relatively stable. Owned brands was up 42 basis point to 36.2% of sales. This is good news going forward as it will support stronger margins. The company offered a small 1.4% dividend increase. That's not much, but we'll take it.</p>

This revised guidance compares to 17.6 million tonnes of saleable production in 2022, and 16.6 million tonnes of saleable production in 2021."</p> <p>What DSR Says</p> <p>12-03-2023, Labrador Iron Ore reported a bad quarter as both revenue (-26%) and cash flow per share (-18%) were down double-digits. The lower revenue, net income and equity earnings achieved in the third quarter of 2023 as compared to 2022 were mainly due to lower pellet prices and lower sales volumes of pellets and concentrate for sale ("CFS"). The third quarter of 2023 sales tonnage (pellets and CFS) was lower by 14% than the third quarter of 2022 mainly due to inventory availability and shipment timing. CFS sales tonnage was 5% lower than the same quarter last year and pellet sales tonnage was 22% lower than the same period in 2022.</p>

This boosted share price by 10% on earnings day! The FFO growth was a result of previous acquisitions and organic growth (rate increase). These positive impacts were partially offset by higher borrowing costs associated with the financing of growth initiatives and lower gains on currency and commodity contracts than in the same period last year. By segment, utilities FFO were up 17% with organic growth of over 10% (inflation indexation!). Transport was up 7%, but midstream saw a 5% decrease due to a partial sale of their US gas pipeline. By closing several previously announced acquisitions in the fourth quarter of 2023, we are adding significant incremental FFO and positioning ourselves to continue to deliver on our decade long track record of 10%+ FFO per unit annual growth,"</p> <p>What DSR Says</p> <p>11-06-2023, Brookfield reported an okay quarter as funds from operations grew by 7%, but the FFO per share remained flat. The results reflect strong operating activities as BEP benefitted from its highly diversified operating platform, inflation-indexed contracts and development in-line with plan. I appreciated that management addressed the poor stock performance on the market. BEP reaffirmed its conviction in generating a strong return on its capital invested. It is also confident to make more acquisitions as the renewables industry is struggling. Speaking of which, BEP ended the quarter with more than \$4B in available liquidity.</p>

Revenue reached \$210 million, an \$8.7 million increase over the same period last year fueled by 9% growth in North America Accessibility. Gross profit was \$72.6 million, representing a 34.5% gross margin, also a record for us. We presented a record adjusted EBITDA of \$33.6 million for the quarter. Without costs of \$0.9 million associated with the Savaria One project, the business would have delivered an adjusted EBITDA of \$34.5 million. These strong metrics are the result of excellent work by our employees, in spite of global volatility,” said Marcel Bourassa, President and Chief Executive Officer.</p> <p>What DSR Says</p> <p>2023-11-06, Savaria reported a good quarter, but the market really liked it (the stock jumped double-digits after reporting). Accessibility segment (79% of revenue) revenue was \$166.3M, +4.8%. Organic growth stood at 5.1%. Patient Care segment (21% of revenue) was up 2.4%. Organic growth was relatively flat. Adjusted EPS was flat at \$0.18, but this is very good considering they recently issued more shares to strengthen their balance sheet and reduce their debt ratio.</p> <p>Press Release DSR Stock Card</p>
